

Volume 68, Number 7, 2004

Proceedings of the Fourth (Ninth) International Seminar on Ferroelastic Physics

S.A. Gridnev Ferroelastic Physics – State of Art.....	1029
B.M. Darinsky, A.A. Diachenko, Yu.I. Saprnov, and M.N. Chaplygin Phase Transitions in Domain Walls of Ferroics.....	1031
S.V. Pavlov Effect of Boundary Conditions on Polarization and Strain Profiles in Thin Ferroelastic Film.....	1039
V.S. Vikhnin, R. Blinc, and R. Pirc Giant Piezoelectric Effect and Strengthening of Magnetoelectric and Magnetoelastic Effects in Ferroelectric Relaxors.....	1043
A.Yu. Zakharov Field-Theoretic Approach to Classical Statistical Mechanics.....	1053
A.P. Shamshin, T.M. Izotova, E.V. Matyushkin, and A.V. Desyatnichenko Application of Groebner Basis for Constructing Phase Diagrams by Catastrophe Theory Methods.....	1061
Yu.F. Markov, K. Knorr, and E.M. Roginsky Order Parameter and Its Fluctuations in Model Hg_2Cl_2 Ferroelastics.....	1065
M.L. Afanasiev, A.N. Vtyurin, S.V. Goryainov, and A.S. Krylov Hydrostatic Pressure-Induced Phase Transitions in $(NH_4)_3GaF_6$ Crystal and Raman Spectra.....	1072
R.F. Mamin, S.A. Migachev, M.F. Sadykov, Yu.S. Greznev, I.V. Lunev, V.V. Izotov, and Yu.A. Gusev Photostimulated Phenomena in $PbMg_{1/3}Nb_{2/3}O_3$	1077
E.V. Milov, V.N. Milov, and B.A. Strukov Frequency Dependence of Switching Parameters in $LaBGeO_5$ Single Crystal near High-Temperature Phase Transition.....	1081
L.V. Zhoga, A.V. Shilnikov, V.V. Shepizman, and G.G. Pankova Change in Kinetic Parameters of Failure of Ferroelastics at Phase Transitions.....	1085
S.A. Gridnev and N.I. Repnikov Study of Crystallization Process in Amorphous $PbTiO_3$	1089
N.Ya. Egorov and S.O. Kramarov <i>R</i> -Curve Behavior of Ferroelectric Ceramics.....	1094
A.I. Burkhanov, S.A. Satarov, A.V. Shilnikov, K. Bormanis, A. Sternberg, and A. Kalvane Dielectric Properties of Disordered PSN–PT Ferroelectric Ceramics.....	1097
S.N. Kallaev, G.G. Gadzhiev, I.K. Kamilov, Z.M. Omarov, and S.A. Sadykov Anomalies of Thermal Conductivity and Thermal Expansion of PZT-Based Ferroelectric Ceramics.....	1101
L.N. Korotkov, S.A. Gridnev, and T.I. Klimentova Electric and Dielectric Properties of Amorphous Lead Titanate in Strong Electric Fields...	1105
N.M. Galiyarova Models of Fractal Dielectric Response of Ferroelectrics with Domain and Phase Boundaries.....	1109
A.S. Sidorkin, L.P. Nesterenko, I.A. Bocharova, G.L. Smirnov, and S.V. Ryabtsev Pulsed Repolarization in Thin Ferroelectric Films of Lead Titanate.....	1120

**Proceedings of the Fifth International Conference
“The Influence of Electromagnetic Fields
on Plasticity and Durability of Materials” and
Proceedings of the Second International Seminar
“The Computer Simulation of Electromagnetic Processes
in the Physical, Chemical, and Technical Systems”**

I.L. Bataronov and A.M. Roshchupkin Effect of Electron-Photon Drag of Defects in Crystals	1123
Yu.I. Golovin, A.A. Dmitrievsky, and D.V. Lopatin Spin-Dependent Reactions between Structural Defects in Nonmagnetic Solids and Their Macroscopic Manifestations	1135
G.E. Shunin Computer Systems for Finite-Element Analysis of Electromagnetic Processes	1140
Yu.A. Bakhvalov, V.V. Grechikhin, and Yu.V. Yufanova Combined Models and Methods for Calculation of Electromagnetic Fields	1148
S.I. Kurgansky and N.A. Borshch Geometric and Electronic Structure of Silicon and Silicon–Metal Nanoparticles	1152
S.E. Demianov Features of Low-Temperature Hall Effect in Aluminum in Strong Magnetic Field	1156
V.N. Dumachev and V.N. Nechaev Localized Electronic States at Interfaces of Ferroelectrics	1160
L.V. Zhoga, A.V. Shilnikov, and V.V. Shpeizman Effect of Electric Field on Durability of Polycrystalline Ferroceramics.....	1164
Yu.K. Timoshenko and V.A. Shunina Electronic States of Silver Chloride Nanocrystal with Edge Dislocation	1169
G.E. Shunin, S.A. Kostrykov, V.V. Peshkov, D.V. Katalikov, P.A. Potekhin, L.I. Bataronov, and Ya.B. Sbitnev FEMPDESolver 2.0 Software Package for Finite-Element Analysis of Superconducting Current Systems	1172
S.D. Kurgalin, Yu.M. Chuvilsky, and T.A. Churakova Simulation of Internal Bremsstrahlung Spectra for α -Decay of ^{214}Po and ^{226}Ra	1180
V.N. Dumachev and V.N. Nechaev Twin Boundary Dynamics in Crystal with Point Defects.....	1185
S.A. Kostryukov, V.V. Peshkov, and G.E. Shunin Finite-Element Formulation of Additional Conditions in Problems of Electro- and Magnetostatics of Superconductors	1189
I.L. Bataronov, A.V. Bondarev, and Yu.V. Barmin Wave Packet Analysis of Experimental Interference Function	1196
B.M. Darinsky, T.V. Pashneva, and D.S. Saiko Description of Atomic Structure of the Condensed Amorphous State of a Single-Component Substance on the Basis of the Hard-Sphere Model	1200
E.A. Polenov, K.V. Bozhenko, L.A. Shundrin, and D.M. Smekalkin Orbital Model of Hyperconjugation, Elementary Theory of Angular Functions of Stereospecific Isotropic Hyperfine Coupling Constants and Their Isoelectronic Invariance in Halogenalkyl-Substituted π -Radicals.....	1206
V.V. Lomakin Effect of Pulsed Electric Current on Internal Dislocation Friction.....	1212–1214
