

Volume 70, Number 1, 2006

Proceedings of the Sixteenth Scientific School-Seminar "Cosmic Electrodynamics and Solar Physics"

B.V. Somov Cosmic Electrodynamics and Solar Physics (on the 80th Anniversary of the Birth of S.I. Syrovatskii)	1
B.V. Somov, S.I. Bezrodnykh, and V.I. Vlasov Mathematical Aspects of Theory of Reconnection in Strong Magnetic Fields	13
S.A. Bogachev and B.V. Somov Some Analytical and Numerical Models of Particle Acceleration in Collapsing Magnetic Traps	29
B.V. Somov and A.V. Oreshina Particle Acceleration to Relativistic Energies in Reconnecting Current Sheet	47
I.V. Oreshina and B.V. Somov Ion and Electron Acceleration During Flare of October 28, 2003	55
V.D. Kuznetsov Results of CORONAS-F Observations of Solar Flares and Active Events in the Sun.....	61
B.V. Somov, I.A. Kovalenko, and I.V. Oreshina Energy Storage and Release in Large Solar Flares	68
A.B. Delone, G.A. Porfirieva, O.B. Smirnova, and G.V. Yakunina Relation of Turbulence in Corona to Magnetic Field Variations	76
L.M. Kozlova and B.V. Somov Increase in Activity at Coronal Hole Boundaries According to Observations in Lines He I 10830 Å and H α	81
I.F. Nikulin Coronal Partings: Observational Features of Magnetic Separatrices	87
G.A. Porfirieva, G.V. Yakunina, and A.B. Delone Magnetic Field Helicity in Superactive Regions on the Sun	91
B.V. Somov and A.I. Khlystov Retardation of CO $_2$ Concentration Increase in Moscow Air Basin	99
V.S. Prokudina, B.V. Somov, S.A. Bogachev, T. Kosugi, and V.N. Kuril'chik Study of Correlation Between Hectometric Radio Bursts and X-Ray Sources in Solar Flare	104
E.A. Gavryuseva Topology and Dynamics of Large-Scale Solar Magnetic Fields.....	111
A.I. Kiryukhina Study of Turbulence in Limb Flare.....	118–120

Proceedings of the Third International Conference "Basic Problems of Optics"

Section 1. Basic Spectroscopy and Quantum Optics

A.M. Basharov and A.A. Bashkeev Entanglement of Two Two-Level Atoms in Microcavity.....	121–125
---	---------

Section 3. Optics of Photonic Crystals and Nanostructures

I.D. Rukhlenko and A.V. Fedorov Resonant Photoluminescence of Quantum Dots: Dynamics of Electron Subsystem ..	126–129
---	---------

Section 4. Optics of Atto- and Femtosecond Pulses

A.N. Bugai and S.V. Sazonov

Effect of Diffraction on Propagation of Electromagnetic Solitons in Medium with Quadratic and Cubic Nonlinearities 130

S.A. Shtumpf, A.A. Korolev, and S.A. Kozlov

Nature and Inertia of Nonlinear Polarization of Dielectrics in Fields of Few-Cycle Light Pulses 135–144

Seminar "Optoinformatics"

V.S. Udaltsov, A. Locquet, L. Larger, J.P. Goedgebuer, and D.S. Citrin

Security of Chaos-Based Communication System. Recovery of Time-Delay 145

L.I. Muravsky, A.N. Sakharuk, N.V. Fitio, and A.V. Pavlov

Ring Median Binarization of Joint Power Spectrum at Optical Correlation of Speckle Patterns 155

L.K. Rimskaya-Korsakova

Increase in Auditory Sensitivity due to Addition of Stimuli with Noise 161–166

Materials of the Tenth All-Russian Seminar "Microwave Physics and Applications"

B.I. Mantsyzov, E.V. Petrov, and M.V. Fedotov

Gap Soliton of Self-Induced Transparency in Periodic Structure with Arbitrary Modulated Density of Resonant Atoms 167

I.I. Popov, A.N. Leukhin, I.S. Bikbov, and K.Sh. Gazizov

Photon Echo as a Method for Optical Information Processing in Hypercomplex Space 174

V.N. Kornienko and A.P. Privezentsev

Study of Oscillation Modes of Supercritical Flow of Space Charge 181–187
